Using Hydroponic Technology to Support Plants and Fish in the Classroom!

If you think topics such as hydroponics, biodynamic farming and the nitrogen cycle are too advanced to model for your students, think again! Learn how to apply biotechnology to balance an ecosystem. Using a tech design and problem solving approach, participants will learn how students can construct and monitor living systems for interactive animal and plant investigations. Participants will assemble and maintain a very simple and low cost aquaponics system that grows plants and fish all year round!

When:

Wednesday, November 12, 2008

From: 4-6:30pm

Where:

The College of New Jersey
Armstrong Hall 102

Who:

Appropriate for upper elementary
through high school curriculum,
and anyone interested!

\$35 Registration Includes:

Take Home materials, PD
Certificate, and Snacks

*Registration Deadline November 6th.
